

Results ^[1]

- **Strengthening the contents, functionalities, knowledge and dissemination of the Platform on Adaptation to Climate Change in Spain, AdapteCCa** ^[2].

To achieve this, the quantity, quality and flow of AdapteCCa information has been increased and new functionalities (such as the **climate change scenario viewer** ^[3]) and contents (**case study module** ^[4]) have been incorporated.

The AdapteCCa Platform is being a source of inspiration for the development of the Portuguese adaptation platform, which is currently under development, and may be a source of inspiration for the rest of the EU Member States that are considering, as in the case of AdapteCCa, establishing links with the **European Climate-ADAPT Platform** ^[5].

See the AdapteCCa leaflet to learn more about the Platform:

- **Creation of a stable Spain-Portugal cooperation framework for the exchange of information on shared vulnerabilities in order to identify common priorities and future actions.**

In this sense, the online celebration of the **I first Iberian Conference on climate change adaptation (#Adaptres)** ^[8], from 18 to 20 November 2020, has established the basis to continue, with a certain periodicity, with the cooperation work between Spain and Portugal. Organised by **the Ministry for Ecological Transition and the Demographic Challenge (MITECO)** ^[9] through the **Biodiversity Foundation** ^[10] and the **Spanish Climate Change Office (OECC)** ^[11] together with the **Agência Portuguesa do Ambiente** ^[12], the Conference has exemplified how cooperation between Portugal and Spain contributes to creating a scenario of collaboration that will allow both countries to make progress in adapting to climate change.

Throughout the project, the foundations have been laid for continued cooperation between Spain and Portugal, through regular meetings between their respective climate change adaptation units.

Find out how Spain and Portugal have joined efforts to adapt to climate change:

- Spanish ^[13]
- Portuguese ^[14]
- English ^[15]

- **Establishment of links with the European Environment Agency through synergies between the climate change adaptation platforms: AdapteCCa and Climate-ADAPT.**

From AdapteCCa you can consult and access the case studies included in Climate-ADAPT, the European Platform on Climate Change Adaptation.

Here you can see how the AdapteCCa and Climate-ADAPT platforms are connected:

- Spanish ^[16]
- English ^[17]

- **Training and awareness-raising of more than 3,000 key actors who will multiply the dissemination and knowledge of adaptation throughout society as a whole.**

These actors have seen their technical climate change adaptation capacities improved and awareness of adaptation raised. To this end, participative training and capacity building actions have been developed involving key actors, whose professional activities have a real impact and have a multiplier effect on the communication of knowledge and awareness of adaptation.

Communication and dissemination:

- **Project summary video ES ^[18] / EN ^[19]**
- **Informe Layman ES ^[20] / EN ^[21]**
- **Análisis del tratamiento mediático de la adaptación al cambio climático en España (2012-2019) ^[22]**
- **Jornada Nacional Herramientas para la Adaptación al Cambio Climático ^[23] (30/06/2021)**

Trainings:

- **Cambio Climático: Impactos, Vulnerabilidad y Adaptación** ^[24] (7 y 11/05/2018), dirigida a técnicos del Ministerio de Agricultura y Pesca, Alimentación y Medio Ambiente (MAPAMA).
- **La Universidad ante el Cambio Climático. Retos y Oportunidades** ^[25] (6/11/2018), dirigida a docentes universitarios.
- **Adaptación al cambio climático en el ámbito local** ^[26] (4 y 5/04/2019), dirigida a gestores locales.
- **Adaptación al cambio climático en el ámbito local** ^[27] (18 y 20/05/2021), dirigida a gestores locales. Primera parte.
- **Adaptación al cambio climático en el ámbito local** ^[28] (18 y 20/05/2021), dirigida a gestores locales. Segunda parte.
- **La universidad ante el cambio climático: retos docentes y posibilidades de acción** ^[29] (14/09/2021) dirigida a docentes universitarios.
- **La universidad ante el cambio climático: retos docentes y posibilidades de acción** ^[30] (16/09/2021) dirigida a docentes universitarios.
- **La universidad ante el cambio climático: retos docentes y posibilidades de acción** ^[31] (21/09/2021) dirigida a docentes universitarios.
- **La universidad ante el cambio climático: retos docentes y posibilidades de acción** ^[32] (23/09/2021) dirigida a docentes universitarios.

Promotion of cooperation and coordination between key actors:

PNACC multi-stakeholder sectoral seminars held:

- **Impactos y adaptación al cambio climático en el sector seguros** ^[33] (27 y 28/11/2017)
- **Impactos y adaptación al cambio climático en el sector de los cultivos herbáceos e industriales** ^[34] (4 y 5/04/2018)
- Impactos y adaptación en la sociedad, la educación y los estilos de vida (12 y 13/11/2019)
- **Evaluaciones de riesgos y adaptación al cambio climático** ^[35] (14/10/2021)
- **Cross-border sectoral seminars between Spain and Portugal:**
 - **Adaptación al Cambio climático en la Gestión del Agua en el Contexto ibérico** ^[36] (21 y 22/05/2018)
 - Adaptación al Cambio Climático en la Gestión de Sistemas Agrosilvopastorales en España y Portugal: Dehesas y Montados (29 y 30/04/2019)
- **Participative evaluation process of the previous PNACC** ^[37]:

The evaluation of the first PNACC (2006-2020), carried out within the framework of the LIFE SHARA project, has resulted in a **report** ^[38] that includes the main achievements, pending challenges and lessons learned from the first National Climate Change Adaptation Plan. To carry out this evaluation, an advisory group was formed that included experts from European, national, regional and local institutions, academia and NGOs, professionals and experts who have accompanied the entire process, proposing guidelines and approaches to be developed in the same. Publication of the report: "**PNACC: Assessments and proposals from stakeholders and interested sectors** ^[39]".

This assessment process has been one of the pillars for the preparation of the new **PNACC 2021-2030** [40], the basic planning instrument to promote coordinated actions to address the effects of climate change in Spain in the coming years.

The PNACC 2021-2030 in 21 questions and answers:
